## 📄 PROFILE

Python & DevOps enthusiast with hands-on experience in Python programming, AWS Cloud, Linux administration, Docker, Git, CI/CD, and infrastructure automation. Skilled in developing automation scripts, deploying cloud-hosted applications, and working in Linux environments. Familiar with backend development, REST APIs, cloud-native technologies, and DevOps workflows. Passionate about building scalable software, automating deployments, and continuously learning modern engineering practices.

## 📁 INTERNSHIP EXPERIENCE

### Edunet Foundation, Intern

- Developed Python-based solutions and collaborated on cloud deployment projects.
- Worked in Linux environments for development and deployment.
- Used Git/GitHub for source control and collaborative development.
- Assisted in deployment and troubleshooting of cloud applications.

### QSkill Company, Intern

- Developed responsive web applications using HTML, CSS, and Python.
- Collaborated on debugging, testing, and application improvements.
- Used Git for version control and project collaboration.
- Followed software development lifecycle best practices.

## 🧠 TECHNICAL SKILLS

- Python
- Cloud Computing
- OOP
- Operating Systems
- DBMS
- Data Structures & Algorithms
- HTML, CSS

## 🧠 DEVOPS & CLOUD SKILLS

|                           |                                            |
|---------------------------|--------------------------------------------|
| AWS (EC2, S3, IAM, VPC)   | Linux                                      |
| CI/CD (GitHub Actions)    | Terraform (Infrastructure as Code)(Basics) |
| Docker & Containerization | Git & GitHub                               |
| Networking Basics         |                                            |

## 📁 PROJECTS

### AWS Web Application Deployment

- Deployed cloud-hosted applications using AWS EC2.
- Configured IAM, VPC, Security Groups, and cloud networking.
- Managed Linux servers using SSH and command-line tools.
- Automated deployment activities using Git and Shell scripting.
- Performed troubleshooting and monitoring of deployed applications.

### Dockerized Python URL Shortener

- Developed and containerized a Python Flask application using Docker.
- Deployed the application on AWS EC2 running Amazon Linux.
- Configured Gunicorn and Linux server environment.
- Managed deployment using Git and Linux commands.
- Implemented CI/CD-ready deployment workflow.

### Portfolio Website

- Designed and deployed a responsive personal portfolio.
- Hosted using GitHub Pages/Netlify.
- Integrated Git-based deployment workflow.
- Optimized for responsive design and performance.

### Dynamic Task Manager

- Developed a CRUD-based task management application using Python.
- Implemented data validation and modular code structure.
- Applied object-oriented programming concepts.
- Improved application maintainability through reusable functions.

## 🎓 EDUCATION

|                                   |                |
|-----------------------------------|----------------|
| B.Tech, SR University             | 2024 – Present |
| Intermediate, MIMS Junior College | 2022 – 2024    |
| 10th Class, TS Model School       | 2022           |
